

NURTURE GROWTH
INNOVATIVE BIO-ORGANIC FERTILIZER

BIOLOGICAL INNOVATION

FOR CANNABIS CULTIVATION

Science-driven biological solutions for commercial cannabis cultivation.

WORLD'S FIRST
ALL-IN-ONE

- BIOFERTILIZER
- BIOSTIMULANT
- BIOINOCULANT

One biological solution combining three complementary functions to support healthy root systems, nutrient availability, and biologically active growing environments.

SCIENCE-DRIVEN

Grounded in scientific research and the practical application of soil biology.

EVIDENCE-BASED

We communicate honestly and support our recommendations with credible science.

EASY TO INTEGRATE

Designed to integrate seamlessly into existing cultivation programs through foliar application or fertigation.

CERTIFIED FOR ORGANIC OR CONVENTIONAL USE

ADVANCING

CANNABIS CULTIVATION

THROUGH SOIL BIOLOGY

Commercial cannabis cultivation demands precision. Every cultivation decision influences plant health, crop consistency, and production efficiency.

As biological solutions continue to shape the future of modern cultivation, Nurture Growth is partnering with licensed producers and commercial cannabis growers to explore how soil biology can support healthier root systems, nutrient availability, and biologically active growing environments.

Let's start the conversation and explore future evaluation opportunities together.

NURTURE GROWTH
INNOVATIVE BIO-ORGANIC FERTILIZER

> Healthy plants begin with healthy roots.
>
> Healthy roots begin with healthy soil.
>
> Healthy soil begins with biology.

WHY SOIL BIOLOGY?

HEALTHY ROOT DEVELOPMENT
Supports vigorous root systems that form the foundation of healthy plant growth.

NUTRIENT AVAILABILITY
Helps improve the availability and uptake of essential nutrients.

BENEFICIAL MICROBIAL ACTIVITY
Introduces beneficial microorganisms that support biologically active growing environments.

PLANT RESILIENCE
Supports plant health during periods of environmental and abiotic stress.

HEALTHY SOILS & MEDIA
Helps maintain biologically active soils and growing media.

LONG-TERM SOIL BIOLOGY
Supports a healthy and balanced soil ecosystem over time.

WHY NURTURE GROWTH?

Nurture Growth combines the functions of a biofertilizer, biostimulant, and bioinoculant in a single biological solution.

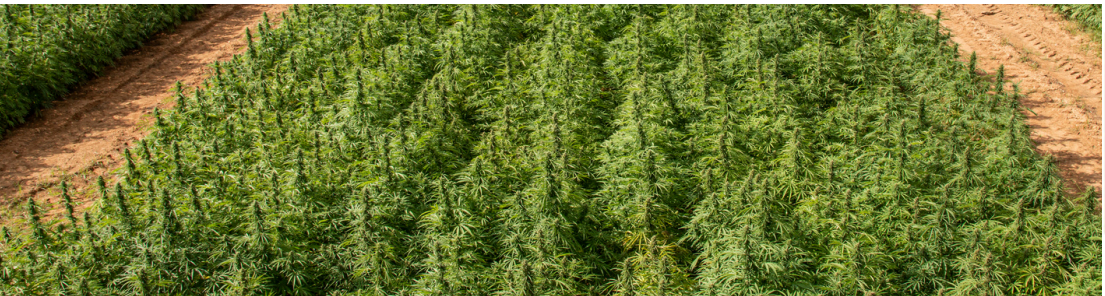

Our proprietary consortium of beneficial microorganisms is designed to support healthy root systems, nutrient availability, and biologically active growing environments while integrating easily into existing cultivation programs.

NURTURE GROWTH ADVANTAGE

TYPICAL BIOLOGICAL PRODUCTS	NURTURE GROWTH
Single function	Three biological functions in one product
Multiple products required	One integrated rbiological solution
Limited microbial diversity	Diverse consortium of beneficial microorganisms
Variable storage requirements	Two-year shelf life
Separate application programs	Seamless integration into existing fertility or foliar programs

DESIGNED FOR COMMERCIAL CANNABIS CULTIVATION

- Indoor cultivation
- Greenhouse cultivation
- Outdoor cultivation
- Living soil systems
- Soil and peat-based growing media
- Coco coir
- Drip irrigation
- Fertigation systems
- CFIA Registered
