INNOVATIVE BIO-ORGANIC FERTILIZER

WE BELIEVE IN GARDENS THAT ARE SAFE FOR ALL LIVING THINGS

We're Gardening For Good. That's why our fertilizer made from food waste is 100% certified organic and safe for both people and pets. It contains no chemicals, just innovative microorganisms that give back to the earth.

WE CARE ABOUT THE PLANET

We're Gardening For Good. That's why we rescue food waste that would otherwise end up in a landfill and transform it into safe, organic fertilizers that give back to the soil. Our goal, to fight climate change and reduce our carbon footprint. We're for a zero waste future and a safe, effective and environmentally responsible approach to gardening. We also know that gardeners can create habitat for wildlife, and their gardens help cool their cities in the summer and improve the air quality. It's all about gardening for good.

Stage Application	Nurture Growth	Water	Coverage Area	Frequency	Instructions
Seed Soak	1 tsp	125 mL	NA	once	Soak seeds in diluted solution for 24 hrs.
Germination	1/2 tsp	500 mL	4 seeds	7 days	Apply mixture until the sprout is soaked in solution.
Seedling	2 tsp	1 L	4 plants	7 days	Apply mixture until the seedling is soaked in solution.
Vegetative	2 tsp	1 L	1 plant	7 days	Apply mixture on leaves of the plant.
Pre & Flowering	2 tsp	1 L	1 plant	3-4 days	Apply mixture on leaves of the plant. Safe to apply up to harvest

NURTURE GROWTH INSTRUCTIONS

- Calculate application area
- Refer to chart to determine dilution rate
- Measure the amount of Nurture Growth bio-fertilizer needed and empty into container
- Fill container with water as per application chart
- Apply mixture on the leaves of the plant and empty the rest onto soil.
- Use mixture within 48 hrs.

"What I didn't like about other products was that I used six different types of fertilizers and nutrients, which also cost a bundle. I was determined to find a fertilizer that could feed my plants during all stages and was affordable. My first crop using Nurture Growth was literally dripping with flowers and terpenes.

I couldn't be more thrilled with my results. I now have what I'd call an award winning crop of CBD! Thanks Nurture Growth!"

Pat S, London, ON, July 2019

NURTURE GROWTH VS. SYNTHETIC FERTILIZER

	NURTURE GROWTH	SYNTHETIC FERTILIZER
100% certified organic	✓	✗
Easy to use	✓	✗
Naturally boost yield and bud density by 10-20%	✓	✗
Protects from overfeeding or burning	✓	✗
Unlock Nitrogen, Potassium and Phosphorus	✓	✗
Builds immunity to resist disease such as botrytis & pythium	✓	✗
Applied during all stages	✓	✗
Improves soil health	✓	✗
Environmentally Friendly	✓	✗
Chemical resin in taste	✗	✓
Toxic build-up of chemicals and salts that can be deadly to plant	✗	✓
Produced from non-renewable resources, including fossil fuels	✗	✓
Change the soil pH and upset beneficial microbial ecosystems	✗	✓
