INNOVATIVE BIO-ORGANIC FERTILIZER

WE BELIEVE IN GARDENS THAT ARE SAFE FOR ALL LIVING THINGS

We're Gardening For Good. That's why our fertilizer made from food waste is 100% certified organic and safe for both people and pets. It contains no chemicals, just innovative microorganisms that give back to the earth.

WE CARE ABOUT THE PLANET

We're Gardening For Good. That's why we rescue food waste that would otherwise end up in a landfill and transform it into safe, organic fertilizers that give back to the soil. Our goal, to fight climate change and reduce our carbon footprint. We're for a zero waste future and a safe, effective and environmentally responsible approach to gardening. We also know that gardeners can create habitat for wildlife, and their gardens help cool their cities in the summer and improve the air quality. It's all about gardening for good.

Application	Nurture Growth	Water	Coverage Area	Frequency	Instructions
Vegetable Garden	1 tsp	1 L	1 row 5 ft	7-15 Days	Saturate leaves and soil area around the plant with mixture. Avoid applying during flowering stage to allow for natural pollination. Resume application after legume has formed.
Flower Garden or Beds	1 tsp	1 L	1 row 5 ft	7-15 Days	Saturate leaves with mixtures and pour remaining mixture directly on the soil.
Hanging Flower Basket	1 tsp	1 L	2 plants	7-15 Days	Saturate leaves with mixtures and pour remaining mixture directly on the soil.
Orchids	1 tsp	1 L	1 plant	Every 2 weeks	Soak orchid plant in mixture for 15 minutes every two weeks.
House Plants	1/2 tsp	500 mL	1 plant	7-15 Days	Saturate leaves with mixtures and pour remaining mixture directly on the soil.
Fruit Trees	2 tsp	2 L	1 tree	7-15 Days	Saturate leaves and soil area around the tree with mixture. Avoid applying during flowering stage to allow for natural pollination. Resume application after fruit has formed.
Lawn / Grass	1 tsp	1 L	50 ft ² 6 yd ²	7-15 Days	Fill Nurture Growth bio-fertilizer in a chapin sprayer, set dial at #2, attach sprayer to the garden hose and apply mixture directly on grass.
Soil Improvement	2 tsp	1 L	22 ft ² 2.5 yd ²	Spring and Fall	Saturate soil with mixture two weeks prior to plant. A fall application is also recommended at the end of the season to replenish nutrients in the soil.

NURTURE GROWTH INSTRUCTIONS

- Calculate application area
- Refer to chart to determine dilution rate
- Measure the amount of Nurture Growth bio-fertilizer needed and empty into container
- Fill container with water as per application chart
- Apply mixture on the leaves of the plant and empty the rest onto soil. Use mixture within 48 hrs.

BENEFITS

- 100% certified organic bio-fertilizer
- Safe to use around people and pets
- Environmentally friendly
- Affordable
- Promotes vigorous growth
- Grow abundant flowers, fruits and vegetables
- Promotes strong root growth
- Improves soil health
- All-purpose usage on plants, flowers & vegetables
- Biodegradable
